*Creating Hope Through Science*

### **Who we are**

*The AMC Cancer Fund is a primary fundraising arm of the University of Colorado Cancer Center. All funds raised through the AMC Cancer Fund remain in the community and support research and treatment being provided at the University of Colorado Cancer Center located on the Anschutz Medical Campus. In many cases, the money raised by the AMC Cancer Fund provides seed money for young doctors and researchers who are on the cutting edge of cancer science. Although the funds raised have significant local impact and the clinical programs benefit hundreds of Colorado residents, the scientific achievements have a national reach and move the scientific community closer and closer to finding a cure for cancer.*

### **Mission**

*AMC Cancer Fund is dedicated to raising awareness and funds for the University of Colorado Cancer Center to support its outstanding programs in cancer prevention, care, education, research and service to the nation.*

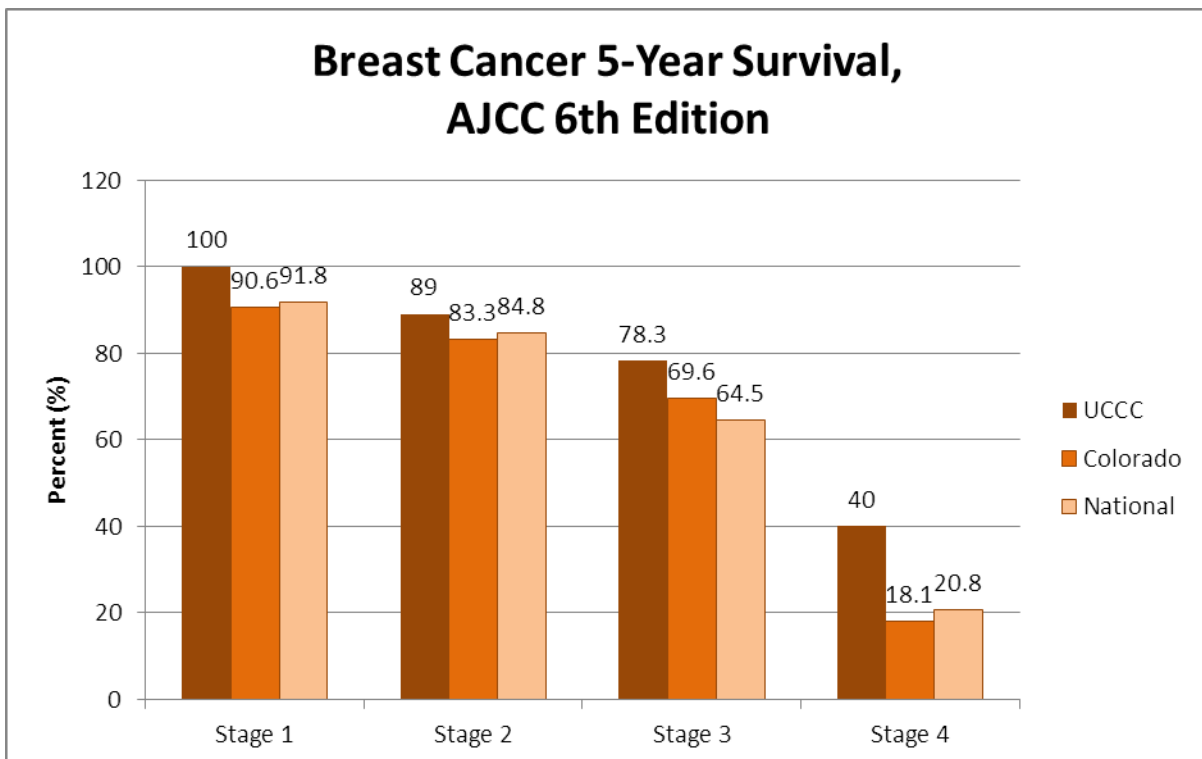

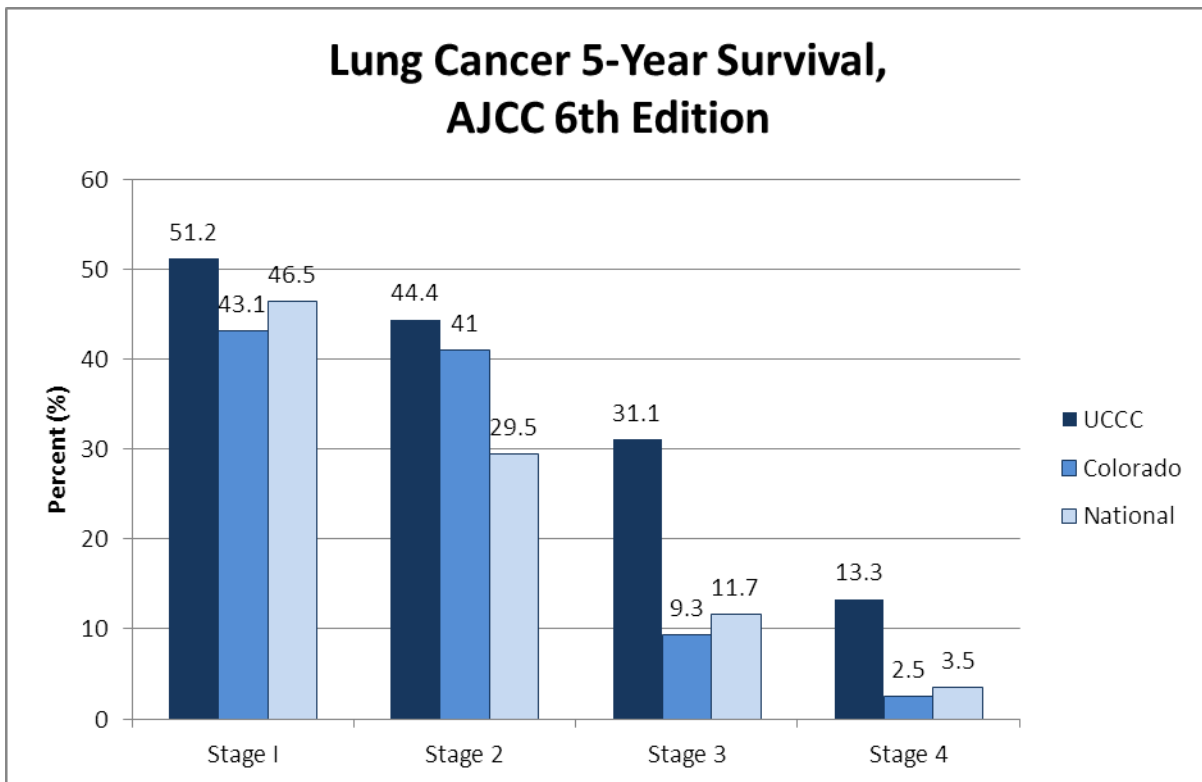

### **Vision**

*We celebrate survival while we work toward a world without cancer.*

### **The University of Colorado Cancer Center**

*The University of Colorado Cancer Center is the only National Cancer Institute designated comprehensive cancer center serving the eight-state Rocky Mountain region and one of just 40 in the United States. CU Cancer Center's scientists and cancer clinicians work at three universities (Colorado State University, University of Colorado at Boulder and University of Colorado Denver), and six institutions, (University of Colorado Hospital, Children's Hospital Colorado, Denver Veteran Affairs Medical Center, Denver Health & Hospital Authority, Kaiser Permanente, and National Jewish).*
